TECHNICAL INFORMATION

App is a pull-out table fitted into a case element with closing flapping door, with or without lateral drawer, to be fixed on the wall or on a boiserie panel.

Possibility to join a drawer on right or left side.

The table has a sliding system on adjustable telescopic rails, a safety stop device and a built-in telescopic supporting leg.

When opening the flap door, the rails of table top are pulled out and the leg is released to rest on the floor, becoming table support.

One of the table tops is fixed to the structure and, combined with the other two table panels with book-style opening, forms the table top in its whole size.

APP can be integrated in Living and Young programs and matched with other transformable systems of the Clei collection.

Mechanism: telescopic rails and supporting leg.

Leg made of anodized aluminium.

Maximum load of closed element fixed to the wall kg 100.

Maximum capacity of the table kg 100.

H table from the floor cm 72.

AVAILABLE FINISHES

STRUCTURE AND TABLE TOP - Melamine white, oak sabbia, oak moro, perla, tortora. Lacquered as per Cleicoloursystem.
