

CIRCE / CIRCE SOFA design giulio manzoni / r&s clei

Transformable system with double bed with horizontal tilting opening system, provided with an innovative patented slatted bed base (CFog).

Model CIRCE mm 350 deep must be fixed to the wall.

Model CIRCE SOFA with front sofa that hides when the bed opens is self standing.

Dimensions :

Closed 2200 x 2160 x 350-1225 mm
/ 86.6 x 85 x 13.8-48.2 inches

Open 2200 x 2160 x 1612 mm

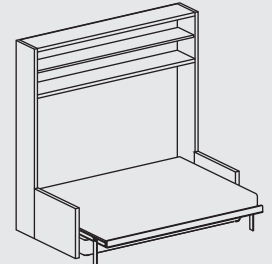

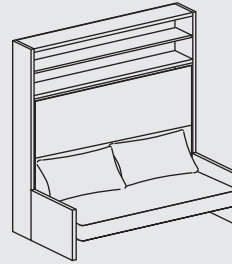

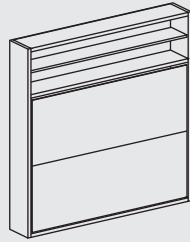

/ 86.6 x 85 x 63.5 inches

Height of bed base from floor 336,5 mm / 13.2 inches

Height of sofa seat from floor 400 mm / 15.7 inches

Sofa dimensions 2060 x 870 mm / 81.1 x 34.3 inches

Seat depth with back cushions 490 mm / 19.3 inches

TECHNICAL INFORMATION

Structure in wood with adjustable feet in nylon

Mechanism of bed base CFog

Mattress: spring, latex, 50% memory.

Mattress locking belts in nylon with buckles in black nylon

Available finishes: Structure: Melamine white dover, melamine Whited /Graphite Oak, lacquer CLEI Colour system

Front: Melamine white dover, melamine Whited /Graphite Oak, lacquer CLEI Colour system, Glossy white Dialux,

Back panels always and only in Melamine White

REMARKS - INSTALLATION AND SAFETY

These models are supplied disassembled and their easy installation is supported by comprehensive instructions.

Model CIRCE must be fixed to the wall in 4 fixing points, using the proper hardware supplied by CLEI (squares, rawlplugs with diameter 6mm / 0.4 inches and the couple nut-bolt) and following the assembling instructions provided together with the goods

A plasterboard is not a suitable wall and the fixing can not be considered safe. (see assembling instructions)

The installer is in charge to test the correct fixing and to provide with workmanlike installation

Model CIRCE SOFA is self standing and as a result it does not need to be fixed to the wall.

The opening system is fixed to the structure with gears that remain perfectly tighten in both the day and the night positions.

Maximum weight supported by the bed Kgs 150

BED BASE CFog

The innovation concerns a bed base with a self-locking mechanism both in the vertical and horizontal position, that avoids accidental opening/closing, and with a front panel to be fixed with no hardware.

Features and advantages compared to the standard bed base :

The safety is assured by the innovative locking system of the bed base through a pin that self-engages (fig. 1)

Opening and closing of the bed base by an easy movement through the device inserted in the foot (fig. 2)

The frame and the look of the front come from innovative engineering: soft lines, great thickness, no handles not to compromise the clear look of the panel+bed base, opening mechanism hidden in the lateral gaps (fig. 3-4)
